

Department of Physics

Graduate Research Assistant Position for Summer 2006

A Graduate Research Assistantship is now available for Summer Quarter 2006. The Research Assistantship is funded 35%, which requires 154 hours of work per quarter. It involves working with Professor Ann Nelson to support research in Particle Theory.

Study Cosmology of Mass Varying Neutrinos, (MaVaNs) including inhomogeneity, observability of neutrino nuggets, and constraints on potential from requirement that MaVaNs act as source of dark energy

Duties may include those listed at: http://www.phys.washington.edu/RA_duties.pdf

Requirements:

- Enrollment in the Physics PhD Program
- Research Experience with particle physics/field theory/cosmology.

The University of Washington is an equal opportunity, affirmative action employer. http://www.washington.edu/admin/eoo/EOO_policy_01.html

For more information please contact Professor Ann Nelson (PAB Room B-411), anelson@phys.washington.edu or tel. 206-543-2027

If interested, please respond by **Tuesday, May 9, 2006.**
