

## Instructions for Checking email remotely with Mozilla, Thunderbird, or Outlook

Be sure to check your settings/preferences to get the correct usernames, and then set your server and port settings on the remote account to the following:

For Physics mail server settings:

IMAP Server: mail.phys.washington.edu

Server Port: 993

Select "SSL" in security settings

For SMTP server settings:

SMTP Server: smtp.washington.edu

Server Port: 25

Enable authentication (use username and password)

Select "TLS, if available" in security settings
