

Hemisphere masses as defined by quadrupole major axis:

Using data in `tt_lhcb.aa`, with `pt` cut, `pt > 25 GeV` and `|\eta| < 3.0`, on everything; events in each plot are I. 32071, II. 8809, III. 7238, IV. 7612.

The visible mass distribution is indicated in the following plot.
